DPI - Submersible Valve Package

The Dakota Pump Inc. Above Grade Submersible Valve Package comes in a compact design that places everything in a "complete from the factory" unit that is fully customizable to meet your requirements. Starting with the aesthetically pleasing fiberglass enclosure that is extremely durable and corrosion resistant protecting it from the elements while complementing its surroundings. The compact design reduces the footprint requirements by eliminating the need for a separate valve pit. This design allows for safe and easy access to controls or valves for maintenance and service reducing the need for service personnel to enter hazardous confined spaces.

Due to a variety of these options and piping configurations, let our professional staff review your requirements and assist with the design of your next project. The opportunities are endless!
